

INSTRUCTIONS FOR USE

clothes lockers

Products: basic clothes lockers, clothes lockers with bench, split clothes lockers, benches for clothes lockers, ZET clothes lockers, box cabinets, clothes locker accessories

To ensure safe and correct functioning of the products, it is absolutely essential to read these instructions and follow them. Observe the instructions and recommendations mentioned below. Non-observance of principles of safe use may result in injury or harm to the health of operating personnel, damage to the products or their parts, fire or death. Do not use the products under the influence of alcohol or drugs. Do not work with the products if you suffer from giddiness, weakness or faintness. Children must be supervised by adult persons.

Use:

The clothes lockers are intended for changing rooms in production plants, assembly workshops, laboratories, test rooms, repair shops, training workshops or similar plants.

Before the lockers are used, they must be set into the horizontal position and (according to their use) anchored. When using the lockers, always strictly observe their maximum permissible load and space layout. The lockers must always be moved empty and only by carrying. Use handling devices to move them.

For anchoring methods and other specific information, see the online virtual consultancy POLAK SMART FURNITURE at www.smfu.eu. Weights of individual products, capacities of bearing areas and the hanging system are indicated in the current catalogue of workshop furniture, which can be found at www.polakcz. Do not overload any of the products or their parts, and or use them other than for the intended purpose. The total load must not exceed the maximum permissible load of the weakest element of the given product.

It is forbidden to apply greater force on the doors of clothes lockers than is necessary to open and close them. If the objects stored inside hinder easy closing, rearrange them, never using force. The clothes benches are intended for sitting and relaxing in building interiors. Ensure that the individual parts of the benches do not clash with the surrounding accessories of the interior. It is forbidden to load the benches by standing or kneeling on them. In case of inappropriate use, there is a risk of injury.

The clothes lockers are not dustproof; therefore, it is necessary to consider their location in plants with increased content of dust particles in the air (joinery workshops, etc.).

Only use accessories recommended and approved by the manufacturer. It is forbidden to modify the design of the lockers or accessories in any way. Use them in conformity with safety instructions only.

If objects are stored which could damage the surface or individual parts owing to their nature, the lockers can be protected by additional accessories, such as a shoe tray. We recommend that you choose a suitable type of product with regard to its use and operating load in coordination with the seller. forcible handling may result in permanent damage.

The clothes lockers have been designed for use in interiors, in a dry environment with stable temperature and adequate humidity. Do not use the products in direct contact with water or in a humid environment. Do not perform manufacturing works which could directly damage their surface or structure unless they are specifically intended for these purposes. Do not expose them to heat sources so that they cannot heat up excessively.

For instructions for setting, repairs and replacement of parts, see www.smfu.eu

Maintenance:

Maintenance involves the application of lubricant to extensions and other friction surfaces, cleaning the surface of impurities with a wet cloth and subsequent drying. For cleaning, use common cleaning agents for household use, intended for plastic and coated metal surfaces of furniture. Do not clean surfaces of metal parts mechanically; do not use abrasive powder agents, agents based on organic solvents, salts, acids or lyes, which can impair the coated surface.

Product disposal:

The products and packaging materials contain parts which can affect the environment after disposal. At the end of their service life, the created waste must be disposed of in conformity with the legal regulations in force. The product consists of parts which can be sorted and recycled separately.

Guarantee conditions:

The operator is obliged to follow the instructions contained in the user manual. Their non-observance is considered a breach of the guarantee conditions. The guarantee does not cover parts worn due to normal operation.
